FREELANCE PROFESSIONAL SERVICES

Dear Potential Employer;

First and foremost, thank you for your consideration. I am hopeful that you will find my skills and experience a good fit for your organization, and I very much hope to contribute towards its future success.

As you will likely deduce from the attached resume, I have developed a long career in a variety of capacities that have afforded me the skills and experience necessary to be a key member of any team I have been a part of. I am personally driven by a need to fulfill untapped potential. To that end, full retirement just has not suited me because I continue to feel the need to be useful. I am looking for a position within your organization that allows me to both balance the flexibility of my semi-retired lifestyle while still providing you and your organization top notch value and experience.

Please contact me with any questions or to schedule an interview. I look forward to hearing from you soon!

All the best,

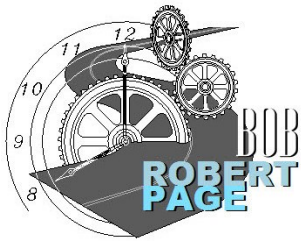

Robert (Bob) Page, Jr.

ABOUT ME

When I'm not enjoying the outdoors with my wife and dogs or catching the occasional blockbuster at the movie theater, I look for every opportunity to apply the skills and experience I have amassed over a 45+ year career. Over those years I have performed all manner of roles in the following areas of expertise: Personnel Management, Project Management, Schedule Management, Budget Management, Vendor Management, Web Design, Graphic Design, CAD Design, IT Support, Surveying, Inspection, Policy & Procedure Development and Enforcement.

EDUCATION

University of Alaska

Fairbanks, AK
Major: Engineering

Virginia Tech

Blacksburg, VA
Major: Architecture

Idaho State University

Pocatello, ID
Major: Architecture

SKILLS

- Creative and analytical person
- Personnel tasking; scheduling; budgeting; and supply management / coordination
- Graphic Arts: CAD, Pencil, Ink, Charcoal, Oil, Acrylic, Watercolor
- Windows & IOS platforms; AutoCAD 2.6 thru 2018; Civil 3D; DraftSight 2D 2022; Office 365, & other Microsoft and Google software
- CADD, graphic, & web applications, and design.
Also see: www.oldbootsandpoppy.com
- Computer and application problem analysis / resolution
- Practical Knowledge of survey, subdivision, & legal description
- Civil site, street, highway, grading, & utility graphic support and design
- Materials sampling & testing
- Programming with Autolisp, & Visual Basic for applications
- Engineering drafting operations & standards
- Building inspection using UBC and BOCA standards

WORK EXPERIENCE

PDC Engineers 1984-2017

Based in Fairbanks AK, I was part of this friendly, exciting, and progressive multi-discipline engineering, design, and consulting firm. PDC became the largest home grown Alaskan based Engineering firm. I've enjoyed contributing to the firm's growth and expansion into Anchorage, Juneau, Palmer, and Soldotna Alaska during my thirty-three years with the firm. My key responsibilities included:

- **Graphics Coordinator**

I was to coordinate and facilitate the firm's drafting department. Through development of standard product production guidelines and nationally accepted graphic standards, I was able to take the lead in the firm's talented body of engineers and support staff to evolve hand-produced graphic products into primarily CADD-produced graphic products. All of these objectives were accelerated by an integrated design/drafting add-on software tool that I designed, coded, and implemented throughout the firm and called "CIVIL-MANager". 'CivilMan' became the primary production enhancement to enable engineers and designers to economically produce their own basic engineering drawings and graphics.

- **Civil / Survey Drafter and Designer**

My everyday duties started and ended with Civil and Survey drafting tasks, but often had to incorporate Civil design tasks. One such design that I am proud of is the 'Delta Visitor Information Center' parking lot, and the 'Sullivan Roadhouse and Historical Museum' interpretive entrance walkway, gardens, and interpretive sign supports.

- **Surveyor**

I was occasionally utilized for survey field support, typically on nearby jobs that needed a 'fill-in' surveyor for the busier seasonal field work.

Key Electrosonic 1980-1984

Based in Milton-Freewater OR, I trained and practiced mechanical & electrical engineering and design of food production line layout, equipment placement, operator walkways, and food processing machinery design: Specifically, belt conveyors, shakers, color sorters, berry decappers, steam blanchers and more.

Toronto Engineering 1978-1980

Based in Pendleton OR, Toronto Engineering provided me with multiple opportunities to develop extensive skill in Survey, drafting, river mapping, materials testing, and building inspection for the city of Irrigon, OR.

Restaurant Management 1974-1978

Based in Blacksburg, Radford, Collinsville, and Martinsville VA, I managed troubled restaurants to re-establish product consistency, employee quality, and general profitability of troubled company stores. I gained valuable experience in money management, operations, budgeting, supply and usage tracking, ordering, and labor.

Survey Crew Chief 1974-1974

Based in Roanoke VA, this opportunity provided me with multiple leadership and standard subdivision layout survey tasks. This work gave me my first practical experience with engineering, architecture, and survey after leaving Virginia Tech.
